## R. SMITH ADVT. MGR. REMARKS ON GOOD CROPS

Advertising Man Tours Carbon District  
and Reports Wonderful  
Grain Crops

CLIENTS TO GO AFTER BUSINESS

Reg. O. Smith, vice-president and general manager of Crowfoot-Harris Limited, a national advertising agency affiliated with J. J. Gibbons, Limited, together with an eastern client, Mr. Smith visited the Carbon district recently and reported excellent crops. R. O. Smith was with the general prospects that the client expects to commence his advertising schedule at the beginning of the new year.

We quote the following remarks of Mr. Smith, as was published in the October 1st issue of the Calgary Alberta:

"In an advertising business such as ours we are constantly in touch with our clients and discussing sales charts. Reports I receive from our various offices keep me in touch with business conditions everywhere in the Dominion and without hesitation I can say that the effect of these reports is that there is a marked improvement and a return to more prosperous times.

"Farmers' houses are also doing much more business," Mr. Smith says. "The reaction of the Canadian and New York stock markets has brought a lot of dollars cash out of holders and it has been invested in so much in bonds as in the past, but the stocks and shares that formerly were on everybody's list during the boom days.

**Natasha Crops at Carbon**  
"Again, we had the pleasure of taking an eastern client through the districts surrounding Calgary and we saw some wonderful crops in the Rock and Carbon areas. One farmer, four miles north of Carbon, harvested 99 bushels from one and one-eighth acres on an average of 18 bushels of wheat per acre. Our client says that these magnificent crops, decided that the time was ripe to start an advertising campaign and after two years, practically, of silence, will commence his printed message to the people after in the New Year, realizing that Alberta would have money to spend."

A baby drank elephant's milk and gained fifty pounds in one week. But it was all right—it was the elephant's baby.

## Take Advantage

OF OUR OFFER TO ACCEPT  
3 BUSHELS OF No. 1 WHEAT  
IN PAYMENT OF ARREARS  
TO "CARBON CHRONICLE"

66½c a Bushel for Wheat!

— USE THE FOLLOWING COUPON —

To Elevator Agent at  
Issue of this coupon in the name of "The Carbon Chronicle" for that amount of wheat.

Subscriber

## WHEAT FOR WORLD'S GRAIN EXHIBITION

With the fine quality of Carbon's wheat crop, which is practically all grading No. 1, many farmers in the district should obtain some of their best wheat and ship it to the World's Grain Exhibition, to be held at Regina in July, 1933. Carbon district has good wheat this year and lots of it, and proof of this is the fact that Spillers of Calgary are hauling grain from the threshing machine direct to their mill at Calgary. They want good hard wheat for good flour and evidently Carbon has that substance the milling wheel that will win prizes at grain shows.

WHEAT FOR WORLD'S GRAIN EXHIBITION

MANY SUBSCRIBERS PLAN TO  
TAKE ADVANTAGE OF OUR  
"SUBSCRIPTION OFFER"

Indications that many subscribers to The Carbon Chronicle will take advantage of our offer to pay their arrears in wheat are very encouraging and many have called and stated that they would deliver grain for payment as soon as they threshed their wheat. We ask all subscribers (farmers) in arrears to stop and think what we are doing to save them a few dollars and at the same time to do our bit towards the bringing about of higher wheat prices. Actually we are paying them more than two dollars for every bushel they send.

This wheat offer will terminate on November 15th. After that date we will not accept wheat in payment of subscription arrears up to The Chronicle. When the offer closes all arrears will be payable at \$2.00 a year and we do not expect to ever again make this amazing offer.

When the 1932 crop was marketed. "Without any hesitation I wish my business shows a decided improvement. The return to prosperity will be slow, but it will be gradual, but quarterly comparisons will prove this beyond any doubt."

## PARTIAL LIST OF PRIZE WINNERS AT SCHOOL FAIR

Only Part of Prize Winners Published  
This Week Owing to the  
Lengthy List

BALANCE ISSUED NEXT WEEK

The following is a partial list of the prize winners in the various events at the Carbon School fair, held on Friday, September 28th. This list will be completed in our next issue.

The Class numbers are not given, but each exhibit is numbered. Prize Winners' names are in order of merit, and when designated would read 1st, 2nd, 3rd, 4th, 5th, etc.

Carrots: Carbon Jr. — Jean Hall, Mary Enderby, Lena Hall, Donald Martin, Irene Wilson, Margaret Enderby.  
Beets: — Lawrence Trappier, George LeMay, Irene Wilson, David Maxwell, Marie Bell, Donald Martin.  
Turnips: — Mary Enderby, Jean Hall, Donald Martin, Marie Bell, Margaret Enderby, Irene Wilson.

Turnips: — Dorothy Hall, Wilfred White, George White, John White, George White.  
Cabbage: — John Gordon, Wilma Gibson, Dorothy Hall, George White, Jean White.

## ANGELICAN MINISTER LEAVES FOR EDMONTON DIOCESE

The people of Carbon generally are surprised to hear of the sudden departure of Rev. and Mrs. L. D. Bateman.

Mr. Bateman, who graduated from St. John's College (Winnipeg) in 1919, after a brilliant career, came to the Carbon-John Mission direct from College. He has lived here for the past fifteen months and during his incumbency has become well known throughout the community. His leaving comes as a distinct shock and his many friends here can only wish him and his wife every success in the new field. Mr. Bateman will be greatly missed and the Anglican particularly will suffer the loss of an earnest priest, a helpful friend and an eloquent speaker.

## QUICK ACTION BY RAILWAY

When they had heard her gone with money, railway transportation and other valuable out of the train within a few miles west of a prairie station, the Carbon Railway Company, a Canadian National train gave up all hope of her trip ahead and appealed to the kindness of the conductor to help her. She was a widow, the conductor is in charge of the train and is a station agent and section foreman mentioned "in the station." Within a few hours of her loss the purse had been found, the train on which she rode had been caught by a snow-bank automobile and the woman was again in possession of her purse and all that it contained. They worked the matter quick very simply. No money had the woman returned her loss to Conductor Abbott a mile or two west of Eden that he got in touch with the agent, A. Clark. Mr. Clark sent a section agent to hunt for the purse and wired Niagara to hold the train a few minutes to see the purse was found. J. W. Lee, section foreman, found the purse lying on the track two miles west of Eden. His hound soon picked up the purse that had been scattered about and took back to Eden should a kind one. Mr. Clark ordered his car and started his train to Niagara, where he caught the train which was being held only ten minutes, or thereabouts.

## WHAT OTHERS THINK

Your home town newspaper is exactly what the local business men want. It is a good newspaper and I can show you a group of enterprising merchants. A poor newspaper is a bad business man.

These are the words of a local business man. "I have heard comments from merchants—'No, I don't advertise, my newspaper here is a bad one.' Or, 'I don't like our paper because I haven't advertised for over a year.' As well as 'I have no use for General Motors and I won't use it on one of our cars.' Your local newspaper is one of the most vital, most important institutions in your community. If it is to be a successful one, it is your fault as well as the editor's. The other day I heard a business man say 'My local newspaper has no circulation and I don't use it for that reason.' 'What is its circulation?' I asked, and the merchant replied that he didn't know exactly but it wasn't as big as it could be.

That merchant was stalling. The real situation was that he had no advertising vision, he didn't want to spend any money for publicity and to justify his stand he blamed the newspaper.

There are results for you in the pages of your home town paper. Measure your trade territory and you will find that it extends just as far as your newspaper circulates. You, therefore, should be back that paper for all you're worth.

These editorial is taken from the May issue of the North West Coal Dealer.

White, Katherine Hall.

Review —  
Carrots: — Doris Tricker, Howard Poon, Delphine Hunter, Stanley Poon, Lilian Olson, Dorothy Gibson.

Beets: — Charles Poon, Bernard Poon, Hilma Lott, Lilian Olson.

Turnips: — Lilian Olson, Bernard Hunter, Wm. Waldron, Dorothy Gibson, Florence Gibson, Doris Tricker.

Peas: — Doris Tricker, Dorothy Gibson, Florence Gibson, Lilian Olson.

Cabbage: — Gordon Poon, Bernard Poon, Charles Poon, Dorothy Gibson, Florence Gibson, Florence Gibson.

(Continued Next Week)

## PETITION BEING CIRCULATED TO HAVE GRAVEL HIGHWAY FROM WEST TO SOUTH THRU' CARBON

EDITORIAL COMMENT: NOW IS TIME FOR IMMEDIATE ACTION. EVERY RESIDENT OF DISTRICT SHOULD DO HIS BIT AND PUSH FOR GRAVEL CONNECTION BETWEEN MAIN HIGHWAYS.

Following considerable discussion and thought on the gravel road from Carbon, connecting this to the old Calgary and the Calgary-Crowfoot Highway a petition has been drafted and is now being circulated in the Carbon and surrounding districts asking for signatures. When the petition is complete it is the intention to have it forwarded to Hon. C. L. McPherson, Minister of Public Works at Edmonton, for his approval.

The petition reads in full as follows:

The undersigned petitioners, residents of the Carbon district, in the Central Alberta, respectfully represent that there is a growing sense of need for a gravelled highway connecting Carbon with the highway from Calgary to Crowfoot on the south, and with the highway from Edmonton to Delburne on the west. The undersigned petitioners to Carbon and in many other localities most intimately concerned in this project believe that there is no greater need for a gravelled highway in any other part of the Province of Alberta than there is in the place we herein indicate. We say this for the following reasons:

(a) Because Carbon is situated 7 miles from the nearest gravelled highway, and when the weather is hot it is practically impossible to get in or out of town.

(b) Because much road is being opened and protected by town and motor trucks from the west in this locality to other parts of the province, and in wet weather motor trucks pass over the road and are usually stranded until the road dries.

(c) Because our train service is of the poorest. Only a slow freight train runs through this section is often stranded on account of wet weather, and at such times the town is passed up by travellers and others for the same reason.

(d) Because we believe it would be difficult to find another town so well situated as Carbon in the Province of Alberta which is so desirable a future, well-situated under so many conditions from the point of view of business and industry as we are. We think, on account of our business, our production and sales, and our trade, that we are entitled to have a gravelled highway to our town and motor trucks to travel some of them free and sixty dollars a year to our section.

The business people in the world are now suffering from a lack of money. They have never heard of contract bridge.

A water-pipe basket placed upside down in a snow storm will catch just as much paper as if it were right side up.

## The Sun Is Shining.

As the writer sits down before his typewriter to type out this article, bright sunshine, typical of these beautiful Indian summer days on the prairies, is streaming through the window, while there are all tantalizing tugs in the air which lead one to throw back one's head and throw it a lungful. The sun is shining, and in these days when we are all too prone to dwell on the dark side of things, it is well to remember that the sun is still there, shining away as strong as ever, the only difficulty being the clouds that intervene to obscure our vision.

The sun still shines, not only in the actual meaning of the words in the physical world, but in the sense that there is much of brightness and warmth in its life. Admittedly there are still difficulties ahead for many people, but there are very acute problems to be solved, not only by individuals, but by communities and governments. These difficulties must be overcome, and solutions for these problems found, but there is not a very large ray of sunshine indeed in the knowledge that never before in the history of mankind were so many people, including the keenest brains in all countries, devoting their time, their intellects, their energies, to searching out and testing the efficiency of the remedies to be applied. The world knows there is something out of joint somewhere and there is sure comfort and satisfaction in the knowledge that people are not just letting things drift in the hope that something will turn up to bring about a betterment, but, on the contrary, are tackling the problem from all angles with the intention that betterment and to preventing a recurrence of present difficulties.

Some people who talk as if they believed the sun had been finally and forever blotted out, go on circulating pessimistic views to the effect that the moral character of people is breaking down and that they are losing their initiative, that, instead of retaining confidence in themselves and a pride in their own achievements, they are willing to become the mere hirelings of the state. In the prevailing atmosphere of gloom for many people, they surround themselves, they see growing up a generation of loafers and criminals. Is this a true picture? If it is, how can one account for such a highly desirable state of things, as reported in the Toronto Globe, that during the recent Canadian National Exhibition at Toronto nearly a million and a half people passed through its gates, and in all that time not one arrest on a major charge was made. As the Globe says this is a remarkable record.

The Globe says that there has been no fire, and that there is no great consequence; further evidence of the commensurate care exercised by dwellers in what for the time-being was a very close proximity to the dangers besetting all densely populated urban areas. There is no incidence in those reports that Canadian people are losing their normal prudence, inclining to disregard the law and to engage in reckless, irresponsible acts.

The sun is shining. The spirit of helpfulness which rose to great heights during the tragic years of the war still lives in the hearts and minds of our people. It was displayed last year when people in the older sections of Canada shipped trainloads of supplies to assist and comfort their fellow-citizens in the drought-afflicted areas of Saskatchewan. It is being displayed this year within the confines of that Province by a great rally of volunteer people who "have" in order that they may give to those who, again this year, unfortunately "have not." It reminds one of the war days when Red Cross branches, Patriotic Fund committees, and other organizations with like objects were organized and active in even the smallest hamlet and rural district, to now read of the organization of voluntary rural relief committees in areas where there are crops—albeit not very profitable—to assist the people in the smaller areas who again this year, there has been no crop. Just as we are, as a people, clinging steadfastly to our old-time concepts of honesty, morality, industry and respect for the laws and institutions of our country.

## French Taking To Tea

Customs Reports Show Imports Doubled In Two Years. People of France, long noted for its wines, are taking to tea. Customs returns show that in the last two years imports of tea have doubled. Moreover, the leaves for the beverage, which formerly came through England, now are shipped direct from India and Ceylon to Montreal, Havre and Bordeaux. Experts say the change is the result of the importation of better tea, and the increasing of hot best results in using the hard Paris water in tea making.

## Always At Work

We do not get rid of accidents by protesting; they ought to be prevented. We see that the laws of Nature by which we sometimes suffer, are always at work, and for our advantage. The ocean waves carry a thousand ships at the very time they engulf one.

The case is reported of a small boy who says his prayers in his sleep. He is reminded of the words of the Bible: "Grace in his sleep, his wife's name being Amelia."

## All Her Children Were Troubled With Diarrhoea

M. J. J. Baker, R. L. Taylor, D.O., writes: "I have treated all my children with diarrhoea, and was so led I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry. I gave a bottle, and after a couple of days they should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

## Australians Pleased

## With Radio System

It Is Nationally Owned and Working Well Says Bruce

Australia's nationally-owned radio system, now controlled by a commission of five, is working well, Sir Hon. Stanley M. Bruce said at Ottawa after the Imperial Conference. The leader of the Australian delegation expressed interest in the national broadcasting commission to be appointed to supervise Canadian radio. Mr. Bruce stressed importance of selecting qualified commissioners and said the entire Australian supervisory body had been chosen because of cultural background, business efficiency and general sympathy with important public movements. "The sure you do not let politics play a part in the selection," he advised.

"I do not think any of the Australian commission members were ever mixed up in politics," Mr. Bruce said. Great interest and considerable satisfaction had been expressed with regard to the Australian commission, which acts in an advisory capacity but as a court of final appeal. The commission does not do the executive work. The commissioners are part-time workers and receive a remuneration of 1400 each annually, with £500 for the chairman.

## Law Bans Shooting

## Ducks At Churchill

Port Still Under Construction and No Firearms Allowed

While sportsmen in northern Manitoba, based on the mainland and on the lake, are free to hunt the mallards and teal as they flow south, the hunters of Churchill had to sit by and watch the birds enjoy the peace and quietude of the closed town. Churchill is still "under construction" and the law says that no firearms are allowed in the camp.

There were hundreds of ducks right in camp. They fed on the grain that scatters from box cars and found choice morsels of vegetable life in the sloughs around the camp. They were quite tame, having been fed for weeks by the workmen.

Troops who arrived from along the west coast stated that ducks and geese flew from the sloughs in thousands of flocks. The ducks in this district are chiefly pintails and mallards, with a few teal. To the north and east and west there are large numbers of Pacific ducks. They are protected the year round so the Eskimos will not run short of food.

## Prefers North Country

Woman Very Eager To Get Back To Alaska

It's nothing to drive forty miles to a dance in the north country, according to Mrs. Elizabeth Marsh, a resident of Alaska, who has been visiting her children at Vancouver.

"The dances are the big social event here," said Mrs. Marsh. "I never missed one of them since going over there twenty years ago."

Mrs. Marsh says she never thinks of the cold in the Arctic country. Winter is coming on now, but she is eager to be back in the land where the sun is covered with ice and snow most of the year.

After several years at Wrangell, Mrs. Marsh went to Fairbanks by train and then 500 miles by dog sled and afoot over the icy Kaituma Pass to McGrath at the head of navigation on the mighty Kuskokwim River. For thirteen years she has been living at near McGrath. She looks after the men's laundry and keeps a store.

Persian Balm the creator and preserver of beautiful compositions. Tonic for the body and wonder skin treatment. Safeguards and beautifies the most delicately textured skin. Cooks and cleanses the skin free of irritation by weather conditions. Magical in results. A little goes a long way. The youthful freshness and daintiness is instantly created. Persians, who are using the hands and making them beautifully white. Truly the perfect toilet requisite for the woman who cares.

## New Help For The Blind

An ingenious apparatus recently perfected enables a blind person to use the ordinary type of books, magazines and newspapers. It raises each letter on a "touch panel" by the use of a light, lens, photo-electric coil, electromagnet and touch points.

An efficacious household remedy—Dr. J. J. Baker's—relieves the most immediate relief to lumbago and muscular rheumatism. Also relieves indigestion, hiccups, nausea, and colic.

An American hunter is to swim in shark-infested waters to "discover why sharks really attack human beings." How will he let his widow know what he discovered?

## SCOTT'S EMULSION

of Norwegian Cod Liver Oil

Builds Resistance

Easy to Take

Had Dual Personality

Amazing Story About British Officer Has Been Revealed

As an officer in the British army during the world war, he was stripped of his rank, degraded before the men he had commanded and sentenced by court-martial to be shot for cowardice.

As a private in the French army, going through the worst hardships around Verdun, he was promoted on the field for courage and decorated with the Croix de Guerre.

That is the amazing story of a dual personality which has been revealed for the first time by French government department.

This coward-hero, an Englishman by birth, was 19 when war broke out. He was working in France, and hurried home to join an English regiment when the war broke out.

Shortly after his arrival on the front he was involved in an affair resulting in his being charged and convicted of cowardly conduct.

The hue and cry for him eventually died down, but apparently driven by remorse, he joined the foreign legion, claiming to be an Alsatian. He gave his name as "Henry Mayer."

He was a perfect front, and he was able to get away with it.

"Mayer" won the rank of captain, was wounded seven times, and has been mentioned numerous times for conspicuous bravery.

Recently his real identity was discovered by the French police, but it is hoped that he will be shown mercy by his own government in view of the extraordinary circumstances.

## No Clerks Needed

Stores without storekeepers are to be opened in London. Every sale will be automatic. Customers will simply walk up to the store window, select what offerings they desire, put their money into a slot and receive the purchase and change immediately. The stores will supply all kinds of proprietary articles, from a box of pills to a pound of tea.

## Makes Use Of Steam

The discovery of a new process of extracting valuable minerals from worthless rock without the labor and expense of first pulverizing the entire ore, has been announced. The minerals are separated from the worthless rock by steam explosive shattering.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils composed of "Prominent" Electric Oil, and there is no alcohol in it, so that its effects are lasting.

## Treaty Still Holds

In order to prevent the city of Syracuse from reverting to the Onondaga Indians, the state of New York gives members of the tribe 16 pounds of salt every year to keep up terms of a treaty made in 1790.

John Hancock's signature on the Declaration of Independence was so large that his name has been synonymous with signature ever since.

We can understand why some people are in a hurry for opera, but why they get peevish because other people are not?

## Wood Regains World's

## Speedboat Record

American Pilot Averaged over 124 Miles An Hour

Gas Wood regained the world's speedboat record by sending his "Miss America X" catapulting twice over a measured mile on the St. Clair River after the Imperial Conference.

The former record, 118.75 miles an hour, was made on Loch Lomond, Scotland, July 18 last, by Capt. James Wood, British speedboat pilot, who tried unsuccessfully to wrest the Harma trophy from Wood.

Wood, after the record-breaking run, said "Miss America" four 12-cylinder engines had not been wide open in the effort and he thought the big, mahogany-buffed thunderbolt could go faster. "How much faster, I can't say," he said. "The motors were making 2,500 revolutions per minute. Their limit, with safety, is 2,700 revolutions per minute."

## Did Not Need Warning

## Eight Calgary Residents Partially Blind in Recent Eclipse

Eight Calgary citizens have received medical attention for varying degrees of blindness as result of watching the eclipse of the sun by the moon August 31, without the aid of darkened glasses. It was shown in inquired of the eye specialists.

One woman is almost totally blind in one eye while her other eye is slightly affected. Others suffered less severe strains and were partially blind.

Whether the affected persons will completely recover will not be known until treatment is further advanced. Practically all will be receiving attention for three or four months.

## Found Their Own Market

## Price Offered Did Not Suit Onions Growers Of Brittany

When growers of onions in the vicinity of Roscoff, Brittany, could not get the price desired for the yield of their small farms last season, they formed a syndicate, chartered a small sailing vessel, loaded on it 60 tons of onions, and sailed for Scotland.

Carrying long loads of the onions on their backs they went from door to door in Glasgow and other cities peddling their wares. When the cargo had been sold the owners figured up and found that the net profit was much larger than had they sold the vegetables at home.

Exhausted From Asthma. Many who read these words know the terrible pain upon health and strength, which comes in the train of asthmatic attacks. Many do not realize that, even though there is one true remedy for Asthma, it is not a cure, but a relief to its distress. It is sold almost everywhere.

## Led In Highway Mileage

## Saskatchewan Heads All Provinces With 155,669 Miles

Saskatchewan leads all the provinces of the Dominion in highway mileage, with 155,669 miles. The province is on December 31, 1931, according to a report issued by the Dominion Bureau of Statistics.

Alberta came next with 62,420 miles, and Ontario with 52,119 in third position. Other provinces, with their miles, were: Quebec, 35,770; British Columbia, 22,499; Nova Scotia, 14,719; New Brunswick, 13,825; Manitoba, 5,230; and Prince Edward Island, 3,650 miles. The total highway mileage in Canada is 378,064.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always remains in reputation.

Eskimos in Canada  
Bureau Of Statistics Report Gives Number As 5,979

There are 5,979 Eskimos in Canada according to the census of 1931, and they are located as follows: Yukon, 83; Northwest Territories, 4,670; Quebec, 1,159; Manitoba, 62; Alberta, three. There are 3,116 males and 2,863 females, says a report of the Dominion Bureau of Statistics.

It is impossible to say definitely whether the Eskimos have increased or decreased during the past decade, but the impression is they are increasing.

Russians Cannot Send Food Through Mail

Attempts To Relieve Famine Discouraged By Soviets

Hereafter bread, flour, cereals, seed oils and other foodstuffs are to be hauled from the mails, the post-office announced.

It is hoped in this way to stop the voluntary and individual attempts to relieve famine which prevails in many provincial districts.

In the past half-year and more the shortage of food has become so serious throughout large areas of the Soviet Union that desperate methods of obtaining bread have been resorted to. The station agents have been ordered to accumulate a few extra loaves of bread, but to the provinces of the famine.

Much food has also found its way through the mails. Friends and relatives in the capital have endeavored to relieve sufferers of their dear ones by occasional shipments of food. Food has not been plentiful in Moscow, but the famine has been plugged. Peasants will henceforth either have to attempt to get aboard already hopelessly overcrowded trains for a personal visit to Moscow—or starve.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders contain the most delicate baby and there is nothing so effective for restoring the health of a worm-worm.

Exhausted From Asthma. Many who read these words know the terrible pain upon health and strength, which comes in the train of asthmatic attacks. Many do not realize that, even though there is one true remedy for Asthma, it is not a cure, but a relief to its distress. It is sold almost everywhere.

# Wheat Exporting Countries Are Keenly Competing For World's Market Of 800 Million Bushels

The following article is by H. G. L. Strang, Director, Research Department, Scarle Grain Co., Winnipeg, Manitoba.

"The world produces each year and consumes in round figures about 4,000 million bushels of wheat. These figures do not include China, which is has been roughly estimated produce and consumes about 600 million bushels. Therefore, the total amount of wheat produced and consumed by the entire world is probably in excess of 5,000 million bushels per annum.

Most of this wheat is consumed in the country in which it is produced. Some countries, however, produce less than they require and so have to import wheat and wheat flour. Some other countries produce more than they can consume and so they export wheat and wheat flour for export sale. The amount of wheat which is thus imported and exported, most of it across the seas—or which enters into international trade—is between 750 and 800 million bushels each year. This is the market and the only market that is available for the wheat that Canada cannot consume at home and which she has to sell abroad.

Canada's average wheat production for the last ten years has been 399 million bushels per annum. Her exports or sales abroad for the same ten years have averaged 281 million bushels per annum in the form of wheat and wheat flour, or about 70 per cent. of her total production of wheat. The amount she has exported as wheat has averaged 237 million bushels per annum, and as wheat flour 44 million bushels per annum.

The total world's export wheat market is slightly under 800 million bushels per annum. About 20 different European countries usually import this wheat. About one-fifth of this total is imported by countries outside of Europe.

Of the European importers Great Britain is the largest, averaging about 220 million bushels each year of wheat and wheat flour, but some of this is re-exported from the United Kingdom to other countries.

The wheat exporting countries, who are keenly competing for this world market, consist of Canada, the Argentine, U.S.A., Australia, Russia, the Balkan States, Argentina, India, North Africa, Chile, and sometimes others, stated above in the order of the quantities they export.

The average exports per annum for the last seven years for each country are shown herewith and the estimated export for the present year is shown in brackets:

Canada, 281 million (200); Argentina, 148 million (142); U.S.A., 151 million (120); Australia, 100 million (112); Russia, no average, last year 93 million, this year 70 million; other exporting countries, 30 million (75).

These exporting countries that are able to offer for sale a higher quality wheat than the average, or who produce the average quality and offer for sale at less than the average price, will retain at least their proportion of the 800 million bushels world's wheat market.

## Only One Ever Used

United States Sinking Six Ships Which Cost Millions

Six concrete ships which have been anchored in the Mississippi River, New Orleans, are to be towed to the mouth of the Grifolia River in Mexico and sunk as a breakwater.

The ships, only one of which was ever used, were built by the United States shipping board during the world war at a cost of approximately \$1,000,000 each. They are 300 feet in length and have a 35-foot beam. They were never placed in operation because it was found they were not suitable for commercial use. They earned 12 per cent. less cargo than steel ships of the same tonnage.

## Observed Motion Law

Justice has taken time out for ancient Motion Law, thereby permitting one of the faithful to have his bath before swearing on the Koran. An assault case in general session, New York, was held over a day when Aidl A. objected to taking oath before bathing. A puzzled judge tried to the Motion Law, but warned Aidl to be ready to testify in the assault trial of Mahorah A. 36.

AN IMPORTANT UNDER ENSEMBLE THAT FITS THE FIGURE—GIVES SLENDER APPEARANCE

Here's a pattern that includes panties to match your slip. Think of the time you have so often wasted trying to find a pair of panties to match your slip. It's simply tedious. It's surprising how little it will cost you.

The slip, cut on princess lines—a few inches to be joined at the neck and hem with the panties. The panties have a fitted yoke and circular legs. Most too full. The edges are trimmed with narrow lace to match the lace on the slip.

It's very effective in pale pink crepe silk with extra lace.  
Style No. 846 is designed for sizes 12, 14, 16, 18, 20, years, 36, and 38 inches bust.  
Size 16 requires 3½ yds. 36-38 for slip and panties with 2½ yards 5-inch lace and 2½ yards 2-inch lace. Price of pattern 25 cents in stamps or buy a slip and panties that matched.

Now that the Ottawa Conference is over, negotiations will be opened at once for fresh commercial treaties with foreign powers, our new bargaining power coming into play for the first time.—News of the World, London, Eng.

## Works Years On Scales Greyhound Racing Old Sport

Wonderful Pair Has Been Designed For Weighing North

After seven years of laborious work, Dr. P. R. Heyl has completed a wonderful pair of scales, designed for weighing the earth. You might expect the scales for this purpose would be of tremendous size. Actually they are quite tiny, and the most important part of them is a tungsten wire one-thousandth of an inch in thickness. So delicate is this balance that it is kept in a basement room, and protected from vibrations by treble walls.

We cannot, of course, weigh the earth as a whole. A method which has been used with success is to measure the gravitational pull exerted by comparatively small objects whose weight is known. The pull the earth exerts upon the moon and upon its other neighbors in space can be found, and from this its weight may be calculated by comparison with the results obtained in the laboratory. By means of his tiny scales, which he calls his "cosmic balance," Dr. Heyl finds that the earth reaches the very respectable figure of six thousand trillion tons, or, if you like to put it in figures, six followed by twenty-one noughts.

**Relief Of Gay Nineties**  
The bicycle built for two is just a modern convenience for Bernard Beck and Neil Van der Veen. They resorted to the relief of the gay '90s at Harvey, Ill., their home, and rode it to Mount Vernon, Iowa to visit Beck's uncle, E. C. Forrest. They averaged 90 miles a day for the 2,038-mile trip, which included a sight-seeing tour of Iowa. Their expenses were \$2.

**Leads Herd Improvement**  
The Carrot River Valley Association again takes the honors with the high average production for herd improvement in Saskatchewan for the last month in records kept by the government. Edmund Herod, of Melroth, holds the record with 66 pounds of butter fat per cow in his herd of nine Holstein-Friesians, according to announcement recently.

**Oil Shortage Predicted**  
Serious oil shortage is forecast by Dr. H. E. Elliott, noted American geologist. He points out that consumption of oil at present in Canada and the United States exceeds production, despite the depression. As soon as business improves, Mr. Elliott predicts, a serious oil shortage must occur.

**With a powerful photo-electric**  
detector attached to a telescope, the brightness of a star can be measured to within one-half of one per cent. of its value.

# Production Of Gold In Canada Has Shown Remarkable Increase During Last Seventy-five Years

"Gold is where you find it"—Canadian has been finding it in such increasing quantities in the last 75 years that the Dominion now ranks as the second greatest producer of the precious metal among the countries of the world.

A booklet prepared by A. H. A. Robinson and issued by the Department of Mines tells of the strides taken by this industry, one that did not feel the depression and never failed to find a market for its product.

In gold riches and prosaic observations that reflect nothing of the hysteric "gold rushes," the "heart-breaking" travel of the pioneers of the Klondike or the hectic life of the mining camp, the record tells of the increase of Canada's output from 34,000 fine ounces valued at \$700,000 in 1835 to 2,600,000 ounces valued at nearly \$56,000,000 in 1931.

In 1930, after a steady increase from 1923, Canada stepped into second place among the world producers, supplanting the United States. In that year, Canada's output was 2,102,068 fine ounces with United States a close third at 2,100,350.

South Africa, leader among world gold producing countries since 1905, has forged ahead with only slight occasional set-backs until the figure was 10,716,351 in 1930.

In 1931 Canada took a better grip on second place with 2,600,219 fine ounces. The United States produced 2,191,881 ounces and South Africa, still increasing its output, 10,874,145.

Gold is found in every province of Canada except Prince Edward Island, but the province of Ontario is now the heaviest producer. Of the 1931 production Ontario accounted for 78 per cent, principally from the mines at Porcupine and Kirkland Lake. Quebec produced 11 per cent. of the total, British Columbia 6 per cent., Manitoba 4 per cent., and the balance from Yukon territory, Nova Scotia and Alberta.

Ranking with coal as the two most important mineral products of the Dominion, gold took the lead in 1931 when the value of the yellow metal produced in this country exceeded the value of coal for the first time.

Changing conditions and changed methods have written the history of gold mining in Canada. Its rise and decline and second rise to even greater heights.

Placer or alluvial deposit mining produced \$2,000,000 worth of gold in 1900, has given way to ore mining, the main source of the present day. At present the average gold recovered from alluvial sands averages \$1,000,000 per year.

At the present time companies working alluvial deposits are located as follows: Alberta, 1; British Columbia, 25; Yukon Territory, 12; Companies working gold ore mines: Nova Scotia, 4; Quebec, 20; Ontario, 53;

Manitoba, 5; Saskatchewan, 1; British Columbia, 33.

In a brief history of the use of gold the booklet tells of the bloody yet romantic place the metal has played in the life of mankind as far back as history reveals. "The object of man's supply, from the earliest times, gold has been, perhaps, more influential than any other metal in shaping the course of human history," says the introductory paragraph. "The lure of gold has drawn men to the most remote corners of the earth and has thus paved the way for settlement and civilization in new countries. It has been a fruitful source of wars and of many other of the strenuous activities, both good and evil, of the human race."

Of little commercial value, except for ornamental purposes, gold has at no time been valued for the industrial uses to which it may be put.

Valued at first as an ornamental substance of some rarity it quickly became a common medium of barter, ranking at first with silver, copper, iron, corn, cloth, skins, and shells. But as the centuries passed, gold passed into discard while gold remained, always and everywhere held in high esteem, until finally it became the accepted standard of value throughout the greater part of the civilized world.

As a matter of course the fact the only industrial use of the metal at present, apart from its ornamental value, is in the making of pen nibs, and fillings for teeth. But it remains the only substance that is freely accepted for all services and commodities in which the globe is so one commodity the market for which is never glutted.

While gold is found nearly everywhere it is not abundant in any one place, and its recovery, in many instances, is too expensive to make it a profitable undertaking. Its scarcity may be evianced when it is realized that if the entire gold production since Columbus discovered America in 1492, were cast in a solid cube, an edge would measure only 36 feet.

Canadian gold discoveries date back to 1823 or 1824 when placer gold was found in the valley of the Chaudiere River in Quebec. But no real attempt was made to recover it until 20 years later. When the world was laid by the ruah of gold seekers to California in 1848 and in Australia in 1851, Canada became "gold conscious" and important discoveries were made in British Columbia.

It was followed by similar discoveries in Nova Scotia in 1862, but up to the present principal output came from British Columbia. The Chaudiere placer mines in Quebec were estimated to have yielded \$2,000,000 between 1823 and 1862.

In 1896 the discovery of rich gravels on the Klondike River in Yukon Territory brought a period of intensive gold mining in Canada. Between 1896 and 1903 the total gold production was more than \$100,000,000 from the Yukon alone. At the same time the industry underwent great stimulation in British Columbia and Nova Scotia. The peak of this development was reached in 1909 when the total Canadian output was 1,350,037 fine ounces of gold, the largest amount recorded for any one year up to that time.

Then production fell off until 1907 when it was only 405,537 fine ounces.

Discoveries at Porcupine and Kirkland Lake brought on the greatest production the country had yet known. These were in 1900 and 1912 respectively. The success of these enterprises led other provinces to seek their home territories for similar resources with the result that Manitoba and Quebec came into the picture. The discovery of gold at Islay, Quebec, and developments there made Quebec the second largest producer among the provinces. Finally in Manitoba transformed what was previously looked upon as a purely agricultural area, into what approaches British Columbia as a source of minerals.

Porcupine and Kirkland Lake remain the most important sources of gold yet found in Canada and give promise to the predominating factors influencing the trend of production for years to come.

In 1930, the last year for which reasonably complete world figures are available, the United States of America contributed about 53 per cent. of the world's gold output, Canada about 24 per cent., the United States 10.42 per cent., Russia 6.6 per cent., and Australia about 2.1 per cent.

## STATES NOTIFIED GERMANY CANNOT MEET PAYMENT

Washington.—Germany formally notified the United States that she would have to postpone the \$7,500,000 payment which fell due under its debt funding agreement, September 30.

In announcing the postponement, Secretary of the Treasury Ogden Mills disclosed that on application by the German ambassador three months ago, he had waived the 90-day notice of intention required for such action. Provision for waiver on the part of the United States was written into the funding treaty.

Mills said inability to obtain the necessary foreign exchange was the reason given by Germany for the postponement.

The payment due under the mixed claims section of the funding agreement amounts to \$4,500,000, and is postponed for two years at 5 per cent. The American army of occupation camps, accounting for the balance, are postponed two and one-half years and carry interest at 3 1/2 per cent.

The secretary said no similar situation has arisen with the other German debtor nations which altogether must meet payments of \$123,500,000 on December 15, unless action is taken to postpone them. The action of Germany makes a total of \$9,052,000 in debt payments postponed this year.

Estonia, Latvia and Poland received notice on September 15 that they would be unable to make payments of \$1,252,000 each on December 15.

## Inquiry Board At Work

Unfolding Mystery Of Loss Suffered By Manitoba University

Winnipeg, Man.—A board of inquiry is slowly unfolding the mystery which envelops the loss of \$1,000,000 in endowment funds of the University of Manitoba.

Less than five hours investigation by the board revealed that looks of the university had not been completely audited in the last eight years, that no report had been rendered as to the condition of investments; that the board of governors had failed to comply with the statutes of the university; and that John A. Macbratney, acting as both chairman of the governors and bursar, contrary to the university act.

## Pension Plan For Postmasters

Would Affect Only Those Receiving Under \$3,000 Annually

Montreal, Que.—At the opening session of the first annual convention of the Canadian Postmasters' Association, Quebec branch, C. D. Griffith, Estevan, Sask., outlined a superannuation plan for postmasters, which had been drawn up by his committee, of which he was a member. It was introduced by Hon. Arthur Sauvé, postmaster-general. The plan provided for contributions to annuity funds to be made, half by the government and half by the postmasters. It would affect only those postmasters receiving under \$3,000 annually, as those who receive more would come under the civil service pension scheme.

## Honor Memory Of Parker

Belleville, Ont.—The body of Sir Gilbert Parker, Canadian-born novelist and statesman, now rests by the side of that of Lady Parker in a private mausoleum in Belleville cemetery, near East Camden, his birthplace. Representatives of every social life paid tribute to the memory of one of Canada's most brilliant sons at the funeral.

## Laborers' Pay Raised

Winnipeg, Man.—City council has made its first upward pay revision. A motion to increase wages of city workers from 40 to 42 1/2 cents an hour was passed by council on a vote of nine to eight.

## But Reports Denied

Moscow, Russia.—The Soviet government denied reports that 100 Bolshevik workers were killed in food riots at Idivorskoy. No riots took place at all, it is said, and the reports were characterized as "more than fabrications."

## Veterans Want Five-Day Week

Montreal, Que.—The Ontario command of the Canadian Legion in convention here prepared to forward to the Dominion command and to the Dominion Government a resolution favoring adoption of a five-day week and a six-hour working day.

## W. N. W. 1962

## Attempt Assassination Of Calcutta Editor

Two Men Commit Suicide After Plan Failed

Calcutta, India.—Two men committed suicide by poison after failing in an attempt to assassinate Sir Alfred Watson, editor of the Statesman, a daily newspaper.

Sir Alfred was shot in both shoulders as he was entering the Statesman, a large park-like area in the heart of Calcutta. A third member of the group tried to kill him but escaped. Police found the automobile they used abandoned outside the city. One of the bullets struck his chest, four, who was seriously wounded, and another grazed the hand of Mrs. Rose Grosse, his secretary.

Frequent threats against the life of Sir Alfred have been made by extremists who objected to the policies of his newspaper. Last August an attempt was made to kill him, but he escaped unharmed.

## Not Much Space Left

Small Area In Building Unfilled For Grain Storage

Regina, Sask.—Two-thirds of the available space in the new building at the exhibition grounds to house the World's Grain Show of next year has now been applied for.

Officials of the exhibition stated that the building has been received from the Board of Grain Commissioners for Canada which body proposes to make use of an exhibit of grain in the building at the time of the world's cereal show next year.

The exhibition of the grain commissioners will occupy a space of 1,500 square feet with 100 feet frontage. The main feature of the exhibit will be a demonstration of Canadian export grades and the influence of hard red spring wheat when mixed with the soft wheat of Europe upon the quality size and color of the bread loaf.

## Planes Damaged By Storms In North

Aviators Carrying Supplies To Sub-Article Have Hard Gales

Churchill, Man.—Fierce gales which whistled round the shore of Hudson Bay, and heavy fogs which made visibility difficult and delayed grain boats bound for this port, played havoc with the three Canadian Airways Junkers' planes, freighting from Eskimo Point to northern outposts, it was learned here.

The "J"s, heavy freighters, sustained serious damage to the pontoons and another of the Junkers' planes was damaged by a heavy storm. During the past month misfortune has dogged the footsteps of aviators freighting in supplies to lonely settlements in the far-sectic barren, and fears are now entertained that food supplies may be running low at some points.

## King Pledges Party To Lower Barriers

Liberal Leader Claims High Tariffs Stifle Trade

Ottawa, Ont.—Declaring the development of Canadian industry and commerce had been thwarted and to a large measure paralyzed by the "excessively high tariffs, enacted by the present administration," Rt. Hon. W. L. Mackenzie King, leader of the Liberal party, pledged his party to continue to seek the promotion of trade by the lowering of tariff barriers.

Speaking on behalf of W. H. Golding, Liberal candidate in the South Atlantic by-election, which would be held by the government and with polling on October 3, Mr. King strongly criticized what he termed attempts of government spokesmen to make the imperial economic conference the issue in the contest.

## Protest From Veterans

Calgary, Alberta.—Alberta command of the Canadian Legion is making strong protests to the Dominion Government because a citizenship certificate the postmasters' post at Canmore, about 60 miles west of Calgary, S. G. Pettit, Alberta secretary of the legion, stated an ex-serviceman, V. J. Jones, was given the appointment at first but later was turned down in favor of a civilian.

## Threats Cause Anxiety

Tsushima, Manchuria.—There is some anxiety here regarding the attitude of 500 Japanese residents in the Manchuria and Hailar districts owing to an uprising of Chinese railway guards who are reported to be plotting to kill all the Japanese they encounter.

## Canada Unlikely To Enter Speedboat Race

Would Be Difficult To Conform To Harmsworth Trophy Rules

Detroit—W. D. Edenburg, chairman of the race committee of the Yachtmen's Association of America, stated he doubted whether Canada could put an entry into next year's speedboat races for the Harmsworth trophy and the world's championship.

Mr. Edenburg quoted rules of the association to the effect competing boats must be designed by natives or citizens of the country from which they are entered and must be constructed wholly and in every respect in that country.

Bert Hawker, of Gravesend, Ont., boat designer who has built Betty Cartairs' entry in the Harmsworth in 1920, he said, had established at that time that he was an Englishman. Hawker was mentioned in an Ontario newspaper on Grilla, Ont., as the designer of a boat which an Ontario syndicate was considering entering in the 1923 races.

Construction of an engine of sufficient power to make its boat a contender in the race would cost the Canadian syndicate about \$250,000, Mr. Edenburg estimated.

## HURRICANE LOSS AT PORTO RICO IS VERY HEAVY

San Juan, Porto Rico.—More than 200 persons were killed and at least 4,000 were injured in the hurricane which swept across Porto Rico, Governor James Beverley estimated after receiving casualty reports from police authorities.

The governor told an emergency relief committee of San Juan citizens that the total dead and injured probably would be revised upward instead of downward when additional reports had been received.

The committee was organized pending a direct appeal to the United States Red Cross for badly needed assistance.

Starting shortly before midnight, a 120-mile wind lashed San Juan and the historic pink-walled buildings, ripping the roofs from houses, blowing down their side walls, and ruining the valuable citrus fruit and coffee crops.

Loss in the fruit crop alone was estimated at \$7,000,000. After a personal inspection of part of the area of devastation, Governor Beverley said the damage to the coffee crop would be even greater.

When the storm left Porto Rico and headed westward toward San Diego, communications in the island had not been restored. It appeared probable that when all cutting points had been heard from the death toll would be considerably higher.

Work of relief and repair got under way in such confusion that it was impossible to determine how high the number of injured would be, but it was reported that hundreds of thousands of persons were left homeless.

The storm put San Juan's water and light facilities out of commission. A new transmission line must be built before power can be furnished for pumping water six miles from the reservoir. Arrangements for a temporary water supply, imperative for reasons of sanitation, were being rushed.

## GLORIA'S HURRY IN FILM DEBUT

## NEW PRESIDENT

Of Montreal, who has been elected president of the Canadian Chamber of Commerce, succeeding Col. W. L. McGregor, of Windsor, Ontario.

Hamilton, Ont.—Rev. Dr. T. Albert Moore, Toronto, secretary to the general council of the United Church of Canada, was elected sixth moderator of the church by the general council in session here.

The election was conducted by Rev. Dr. Richard Roberts, pastor of St. John's United Church, Toronto, and by Rev. Dr. W. L. Armstrong, Trinity United Church, Toronto.

A native of Acton, Ont., he began his career as a printer and publisher, then, turning to the ministry he was ordained in 1884 after completing his studies at Wesleyan College, Montreal.

## New Moderator Elected

Dr. T. A. Moore Appointed Head of United Church

Hamilton, Ont.—Rev. Dr. T. Albert Moore, Toronto, secretary to the general council of the United Church of Canada, was elected sixth moderator of the church by the general council in session here.

The election was conducted by Rev. Dr. Richard Roberts, pastor of St. John's United Church, Toronto, and by Rev. Dr. W. L. Armstrong, Trinity United Church, Toronto.

A native of Acton, Ont., he began his career as a printer and publisher, then, turning to the ministry he was ordained in 1884 after completing his studies at Wesleyan College, Montreal.

## Student Flyer's Death Caused By Accident

Parachute Used By Winters Property Packed Stated Instructor

North Battleford.—After brief deliberation, the jury inquiring into the death of Charles J. Winters, Wilkie flying student, who crashed to his death when his parachute failed to open, returned a verdict of accidental death. No riders were included in the verdict.

Chief evidence was heard from George Bennett, R.C.A.F. instructor who has been instructing flying club students in the art of parachuting. Bennett told the court he had made 1,008 jumps during his career and in only one instance had it been necessary to use the emergency chute. He had trained between 350 to 400 students, he stated. He voiced the opinion that Winters had taken off the wing of the plane in a somewhat and had become entangled in the harness, causing the chute to stay closed. He stated definitely that the parachute was properly packed.

## SCRIPT IDEA HAS PROVED SUCCESS IN ALBERTA TOWN

Calgary, Alberta.—By enabling citizens of Raymond to pay off more tax arrears than they were liable to pay, the revolutionary script of issuing its own script on the security of the unpaid taxes of the district was able to reduce borrowing of \$50,000, higher water collections and improved receipts in all departments.

The town has also been enabled to pay its debentures as they become due, no money is owed the bank on current borrowings for town finance, and in addition the council has been able to reduce borrowing of 1931 by several thousand dollars.

Faced by acute financial problems at the beginning of the present year, the revolutionary script of issuing its own script on the security of the unpaid taxes of the district was able to reduce borrowing of \$50,000, higher water collections and improved receipts in all departments.

## Dawning Of A New Era

**Fifty Years Ago Election Saw Possibilities Of Eminent Success**

When the lights of fifty-nine customers were turned on exactly half a century ago in a square mile of downtown New York Edison declared that the occasion marked the transition from one epoch to another. At the time the observation was attributed to the natural enthusiasm of an inventor in his thirty-third year, the sort of flourish that one expects at the completion of a public enterprise. But now that the fiftieth anniversary of his greatest achievement has been celebrated it is evident that he saw more clearly than any of his contemporaries how electricity would transform society. Trolley cars and subways instead of horses. Edison lamps in place of kerosene and gas, motors driving everything from sewing machines to battleships, energy on tap everywhere, like water—a new epoch had indeed dawned when the switch was thrown in Pearl Street on September 4, 1882.—New York Times.

### Dogs Aid Smugglers

**Show Extraordinary Cleverness In Evading Spanish Coastguards**

Spanish coastguards have to face a new enemy in the form of cleverly-trained dogs used to smuggle contraband ashore from boats, according to General Sola Pacheco, of the Corps of Carabiniere, in a statement made to a Madrid newspaper.

The general says: "It is extraordinary the way these dogs work. When they see a carabiniere they change their direction, and avoid him without making a sound. On reaching the shore they do not shake themselves, as dogs usually do, but set off at a full speed to their destination. Nevertheless many of them are shot down."

The dogs carry the contraband in bundles wrapped in waterproof material and strapped to their backs.

### Feature At Chicago Fair

**Women's Importance Will Be Fully Recognized At Exposition**

Contributions of women to the social and economic life of the world during the last 100 years will be fully represented at the 1933 Century of Progress Exposition.

There will be no special women's building, because "womanhood" in the economic and social world has become too important to be isolated in a special building," officials in charge of arrangements declared.

Plans are also being pushed for the International Congress of Women that will be held in conjunction with the exposition.

### Greek To Him

An oculist was examining the eyes of a patient and had requested him to read the top line of a test card, the letters of which ran H P R T V Z B F H K.

When some moments elapsed, the specialist said: "Do you mean, if you cannot read letters of that size, I can see the letters all right," replied the patient, "but I can't pronounce the blooming word."

### An Envious Position

Red Deer, Alberta, after three years of depression, can show an enviable financial sheet. It has a balance in the bank of \$14,000 which is \$7,000 more than last year, and sufficient funds to meet an \$18,000 debt on October 1, with a nice nest egg for the future.

### Compulsory Survey

A survey of the town of Churchill, Man., will be completed this autumn for the purpose of laying out the residential area of the townsite in preparation for settlement next year, according to Hon. J. C. McDermid, Manitoba Minister of Natural Resources and Industry.

Two factories just started in Norway will produce pencils and lighting rods.

"Now we are engaged, I must confess that I have an uncle and a niece." "That's all right. All my uncles ought to be in prison."—Vart Hem, Stockholm.

W. N. U. 1952

## A Musical Genius

**One Armed Pianist Gives Remarkable Performance In London**

A musical genius of only one arm achieved a great triumph at Queen's Hall, London, as a pianist. It was at a promenade concert and the artist was Paul Wittgenstein, who was an Austrian soldier in the great war, received a wound which devastated the amputation of his right arm. It was the first performance in England of a novel work, namely a pianoforte concerto, the solo part having been written for this handicapped pianist.

A writer in the New-Chronicle says of the one-armed pianist: "One scarcely knows whether to admire more the courage or the resource of this musician. Finding himself disabled by the loss of an arm, Wittgenstein's first step was to commission the leading German composer of the day, Richard Strauss, to write for him exclusively a work for piano and orchestra with a solo part playable with one hand."

"The single work was the remarkable story associated with it took Paul Wittgenstein round the world and established his reputation. He has followed up that commission with others, and the concerto played in London, England, is the result of a similar deal with Ravel, the Esque concerto."

### Two Seamen Killed

**On French Submarine**

**Thirty Also Injured In Explosion During Tidal Run**

An explosion aboard the new French submarine "Peres" during a tidal run off Cherbourg, killed two seamen and injured 30 others, three of them critically.

Six more were seriously burned and 22 suffered minor injuries or burns, or both.

Most of the injured were from the French naval dockyards and were aboard for the trials. They were buried while putting out the fire.

The "Peres" is the name type of the submarine "Promethee," which sank off Cherbourg last July with a loss of more than 40 lives.

### Height Of Tower Changes

**Eiffel Structure Expands And Contracts According To Heat**

The Eiffel tower, still slim and trim after 43 years of watching Paris grow larger and larger, increases in height from 50 to 75 centimetres during the French dog days when the excessive heat caused the steel structure to expand. When winter winds blow the tower shrinks below its normal 300 metres, due to contraction. The head yards from side to side as much as ten feet, but, like the Goddess of Liberty in New York harbor, whose head is empty and who sways noticeably from side to side, the Eiffel tower is perfectly safe.

### Figures Are Confirmed

**Professor Piccard Reached Height Of Ten Miles In Balloon**

Prof. Auguste Piccard and Max Cosmo, both Belgians, reached height of 16,201 metres (10 miles, 117 yards) in their world balloon ascension of last August 18, stated an official report by the Swiss Aero Club, received at Brussels, Belgium.

Though slightly below the height of 16,500 metres claimed by Professor Piccard, the official figures showed they ascended higher than any other human beings, and exceeded the record of slightly under 10 miles made last year by the professor.

### Tire To Form

They were in the club and the conversation turned to Skettunen. "From my experience," said Brown, "I've found it best to take a lot of stories about Skettunen with a pinch of salt. For instance, I once knew an Aberdeen man who found a 22-carat gold ring in the street. The old blighter at once put a big display advertisement in a local newspaper. He stated that all the owner had to do was to pay for the advertisement."

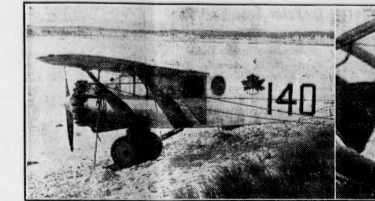

"Well, that was certainly very decent of him," put in Smith. "You don't do that," replied Brown actually, "but that isn't the point. The Skettunen was the editor of the newspaper."

### Princes Not Exempt

Even princes are not exempt from chastity leaving "a lot of little things" which others may pick up. The Duke of Gloucester lost his suitcase, pilfered from a car, temporarily unemployed, being driven in the west end of London, England, it did not contain anything of very great value.

Italy has a back-to-the-farm trek.

## CANADIAN AVIATOR TO FLY TO MOSCOW

Captain Errol Boyd, only Canadian to fly over the Atlantic Ocean in a non-stop flight, has announced his intention to take off from New York for Moscow as soon as the weather is right. By taking this line of flight Captain Boyd hopes to break the long distance non-stop record now held by John Russell Boardman and John Polando on their flight to Turkey. Above are pictures of Boyd and his plane.

### Near-Gold Dinner Service

**Made In Sheffield As Joke It Created Immediate Demand**

Would you like a gold dinner service? If so it will not be long before you can buy it just as cheaply as the familiar nickel plate.

Curiously enough, the new "gold" is made in Sheffield, the city of steel. The first just-like-gold dinner service was made as the result of a joke. Messrs. W. Turner and Co., had been experimenting for some time with a new alloy of aluminium and bronze which has all the appearance of good red gold. "Why not make poor men feel like millionaires?" someone suggested, and for a just the first near-gold dinner service was made. To the surprise of the firm it aroused an immediate demand. People liked the idea of eating off gold, and the new metal is easy to look after, since it is almost stainless.

The biggest demand, though, is likely to come from South America and other Latin countries, where the deep love of the gold itself or of metal that looks like it.

### Work Is Made Easy

**Poultry Raisers Can Have Many Labor-Saving Devices**

Labor-saving devices for poultry raisers are numerous. By pulling out all the windows on a thirty-foot section of a shed can be made to open or close at one time. Poultry food is not carried into the houses. It is brought alongside by motor-buggy; then a smaller door in the wall is opened, a hopper drawn out, and the food tipped straight into it. It falls into a container inside the house. All the houses are supplied with fresh water, which is kept during the winter at a temperature of forty to fifty degrees Fahrenheit by electricity. From October to February, to increase egg production, the birds' feeding day is kept at fourteen hours. Electric light is switched on and off by time-clock, morning and evening. The poultry food is mixed on the premises in a giant blender. It is given to the birds in the form of an all-mash ration, of which they consume nearly 300 tons a week.

### Saving Wet Wheat

**Grain Can Be Dried Without Damage To Quality**

Artificial drying of wheat in Canada has now been practically perfected by the National Research Council's Associate Committee on Grain Research. Losses of crop ranging from 28 to 50 per cent, and cash deductions totalling millions of dollars were sustained by Canadian farmers in recent years through tough or damp grain. The latter may now be dried without damage to its milling and baking quality through the efficiency of commercial driers. Experimental work is being extended to include processes for the drying of barley and other coarse grains.—Department of Agriculture, Ottawa.

### Condensed Milk Exports

Exports of Canadian condensed milk in July registered an increase of 33 per cent. Over July, 1931, exports of evaporated milk were practically doubled and milk powder exports increased by 27 per cent.—Department of Agriculture.

### ♦ FANCIFUL FABLES ♦

**A Great Combination**  
Judge—"How fast were you going Sambo?"  
Sambo—"Tobacco fast."  
Judge—"Thirty miles an hour?"  
Sambo—"Yessah. Ah wuz goin' mob don dat. Oh, yessah. Ah wuz goin' mob dan 30 miles an hour. Ah wuz goin' 70 miles an hour. Oh, yessah. Ah wuz goin' 70 miles an hour, yessah. Jedge."

**Sambo**—"What kind of a car were you driving?"  
Sambo—"A Ford, Model T."  
Judge—"Preposterous, you could not go 70 miles an hour in a Model T Ford. That's impossible!"  
Sambo—"Oh, no, sah, t'aint impossible at all. Ah always makes mah 70 miles an hour in dat car. Is a special kind of Ford, Jedge. Dis cab has got a Ford body a Packard chassis, an Pierce-Arrow glands."

### Service In Yorkshire

**Disturbed By 'Plane Machine Carried Camera Men Anxious To Get Pictures**

The press photographer who takes his pictures from an aeroplane has got himself into bad odor in several parts of England. A special Sunday service was held in the ruins of Fountains Abbey, in Yorkshire, in commemoration of the 500th anniversary of the death of the Duke of York. The service was attended by the Duke and Duchess of York. It was a perfect day for a celebration held in such wonderful surroundings. Yet the words of the Bishop of Ripon were almost drowned by the roaring of an aeroplane, annoying preying photographers, which persisted in swooping down over the ruins.

Something very similar happened during the postnatal high mass in Phoenix Park, Dublin, Ireland, at the Eucharistic Congress. An aeroplane intruded at the most solemn moment.

### MotORIZED FARMS

**Some Interesting Figures From Dominion Bureau Of Statistics**

From the current issue of the "Economic Annalist," official organ of the Dominion Agricultural Economics Branch, the following figures are taken:—"From a recent report of the Dominion Bureau of Statistics we learn that there were 321,500 automobiles on the 728,628 farms in Canada; about eighteen thousand farms reported more than one car. There were 45,402 tractors, 105,069 tractors, 76,560 threshing machines and 8,925 combines. Electric motors numbering 18,826 were found on 14,638 farms."

### Opinion Was Divided

"You say you are the sole support of your mother, your father having been killed recently in an explosion. How did the explosion happen?"

"Mother says it was too much yeast, but Uncle Jim thinks it was too little sugar."

**Still Going Strong**  
Thousands of human generations all as noisy as our own, have been swallowed up of Time, and there remains no wreck of them any more, and Acturus and Orion and Sirius are still shining in their courses, clear and young, as when the Shepherds first noted them. Carlyle

### Sheep Was Novelty

When an aeroplane, zooming low overhead, vied for attention with a truck speeding through Red Wing, Minnesota, with its cut-out open, no one paid any attention to the noise. Two minutes later a sheep, being carried on a second truck, began to bellow. Traffic was tied up and business was at a standstill as clerks and office workers ran to the street or leaned from windows to see the cause for the excitement.

First June Bride—Oh, a joint bank account must be nice.  
Second June Bride—Yes, it's a lovely arrangement. My husband deposits the money and I draw it out.

Friend—How dreadful! The train in which you were travelling actually crashed into the waiting room!  
Mrs. Newrich—Yes, and the third-class waiting room, of all places!

### Thirty-Nine Countries Listed

**Number Entered So Far For World's Grain Show**

Thirty-nine countries, provinces and states are listed at the present time as officially participating in the World's Grain Exhibition and Conference to be held in Regina, July 24 to August 5, 1933. Countries, provinces and states participating as at the present time are: Belgium, Czechoslovakia, Estonia, France, Germany, England, Scotland, Northern Ireland, Wales, Holland, Italy, the Netherlands, Poland, Spain, Switzerland, Yugoslavia, the Union of South Africa, Algeria, Tunisia, India, Japan, the Philippines, Australia, New South Wales, New Zealand, the Jewish Colonization Association for Palestine, the Argentine, Peru, Chili, several states of the American Union, the United States Federal Department of Agriculture, Guatemala, Mexico, the Norfolk Islands, Burma, the nine provinces of Canada and the Canadian Federal Department of Agriculture. All of these will participate either by way of sending official delegates or by entry in the competitive classes or by national exhibits.

### Canada's Grain Elevators

**Greatest Number Of Them Are In Country Districts**

There is a total of 5,872 grain elevators with a capacity of 414,800,366 bushels in the western and eastern divisions of Canada. Of this total 5,784 are country elevators with a capacity of 192,338,000 bushels. Manitoba has 139 elevators with a capacity of 23,751,500 bushels. Saskatchewan has 8,227 elevators with a capacity of 105,855,400 bushels. Alberta has 1,748 elevators with a capacity of 75,344,000 bushels.

### World's Slowest Train

**Takes Week To Cover 1,051 Miles In Australia**

Australia believes it has the "slowest train in the world. It is the 'loose and sugar' special, which carries stores from Port Augusta to settlers along the route to Kalbarrie. The schedule calls for a week to travel the 1,051 miles and a week for the return trip. Practically the only passenger is William Cowan, the railway's unadventurous missionary, whose "parish" covers the entire line. He carries hundreds of newspapers for distributions on each trip.

### More Gold Salvaged

The Italian salvage ship "Artiglio II," has deposited at Plymouth, England, a fourth cargo of gold retrieved from the sunken liner "Egypt." The latest haul was the equivalent of \$450,000. This makes the total salvaged \$3,250,000 out of \$3,000,000 in bullion in the Egypt's strong room when she sank in 1922.

### Gold Stamped In B.C.

Old gold workings near Kennedy Lake, on the west coast of Vancouver Island, are being prospected again, it is learned, and a small stampede has resulted, leaving at least some small coveys short of help. The department of mines has had no advice from the district.

The game of badminton, then known as "Poonie," was played in India for centuries before it became known to the English in 1873.

Commodity prices in Japan are advancing.

**WHAT THE WHEAT CROP  
MEANS TO CARBON**

To hear the expostions of labor talk,  
one would almost think that the west-  
ern wheat crop will mean very little  
to Canada and its economic condition.  
However, let us take things figuratively  
and keep close to our own, the  
Carbon district. We estimate that we  
will use one million bushels of wheat  
pass through Carbon out of the 1932  
crop. At 30 cents per bushel this will  
mean \$300,000.00 for the immediate  
district. He spent in wages, food,  
clothing, and other commodities. Think  
of it! \$300,000 is a pretty big pay roll  
for Carbon—\$25,000 a month—to be di-  
vided amongst an estimated popula-  
tion of 2500 people, taking in the town  
of Carbon and the district.

But, again, take Carbon's position  
and the business man's position in  
Carbon. His trading area is larger  
than the wheat center of Carbon. The  
wheat grown in the Carbon trading  
area this year has been conservatively  
estimated around 4,000,000 bushels, and  
this yield will no doubt run over the  
five million bushels when returns are  
complete. At 20c a bushel this will  
mean \$1,200,000 to the farmers of the  
district, and this amount is going to  
be spent in the district before another  
year passes.

Rarely Western Canada's wheat crop  
will mean much to the Dominion when  
our own district proves its grain crop  
profitable.

Let the farmer stick to the land and  
the prosperity of the world will return  
at last to our malnourished. Our wheat  
crop is our malnourished.

day for a short visit, and returned on  
Monday. During his absence Miss K.  
Neher helped in the store.

**NEW  
COLEMAN MANTLES  
Give Better Light**

The new and improved Coleman Mantles  
produce better light and a third more of it.  
They are made of special treated rayon  
fiber and saturated with the purest of light  
giving chemicals.

They are tougher, more flexible, with-  
stand shocks and jars... made stronger to  
last longer. Scientific correct in design,  
size and mesh. No side seams. Reinforced  
across bottom where pressure is strongest.  
Always uniform quality... the best.  
Made especially for use on Coleman  
Lamps and Stoves.

Buy them by the package.

**Youthful Strength**

Dr. Maxine Hirschfeld, the well-known authority on Rosalby  
and Director of the Institute of Sexual Hygiene, Berlin, Germany,  
created

**TITUS PEARLS**

To help the millions of men and women who have lost or are losing  
their vital physical power. In his 35 years of practice and research  
however, he realized that the weakening of man's glands was also  
responsible for other troubles: High blood pressure, hardening of  
the arteries, physical exhaustion after work or exercise, distress,  
depression, neurasthenia, etc.

All these troubles can be removed with Titus-Pearls. Numerous  
cases were treated by Dr. Hirschfeld in his Berlin Institute.

L. R. (State Official) 60 years old, married, complained of  
physical exhaustion, distress and trouble. Was weak (lost). Needed  
powerful and slow moving. Physical powers had been exhausted  
for several years. Blood pressure too high. Gave 2 Titus-Pearls  
2 times a day, 2 weeks later the medical report on this man was—  
General health better, more vigor; distress much less and returning  
of power. Treatment continued and 2 weeks later L. R. reported  
again, this time to say that all weakness and exhaustion had gone,  
he felt fresh and buoyant. His blood pressure had fallen and at 60  
years of age he had regained his physical power and vitality that  
he had known in the prime of his life.

Start receiving your youthfulness now! Put in 2 weeks time  
you will be aware of the new, vital force within you. Send \$5.00  
(cash enclosed or money order) for 3 weeks treatment.

Write for Booklet G.O.D. Orders Accepted
